

01. The Louve

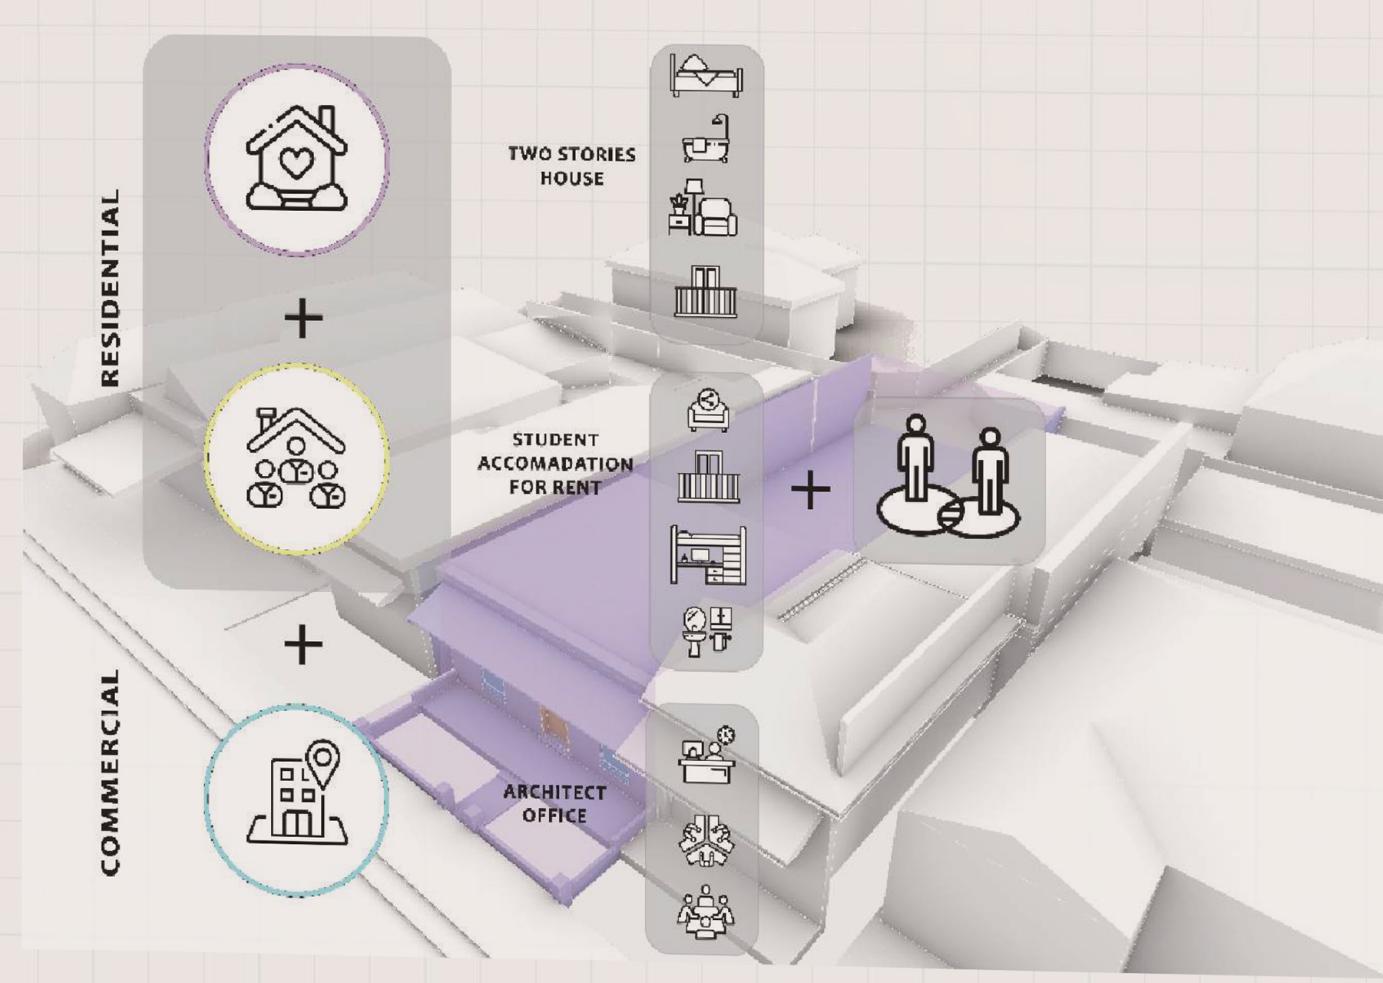

'Think Inside the House'

Location: 169 Victoria St, Brunswick, VIC 3056

Site Area: 290m²

Project Work: Individual Work

Tools used: AutoCAD, Rhino, Photoshop, Lumion

Focused on sustainable residential design in Brunswick, Victoria, this project emphasises reusing and recycling materials. Historical influences shape the design process, with a focus on passive solar principles. Hands-on experimentation with real materials informs the design, leading to a final outcome that integrates sustainability and functionality seamlessly.

Design Program

The design program prioritises a commercial space for the architect's office, alongside two residential dwellings. In the main residence, four bedrooms are strategically arranged to meet the family's needs and provide accommodation options for additional income. A central courtyard enhances aesthetics and functionality, serving as a communal space for residents.
